

PERSONAL

Beginning with a dial-up connection, my web work has been varied and adapt to progressing technologies.

My full-stack skillset incorporates the development, design, deployment, marketing and maintenance of web solutions within different industries.

I am experienced in managing multiple clients and projects in an affable and proficient manner.

I am eager to continue to broaden and refine my role in a long term position.

WORK EXPERIENCE

Magento Developer

Design A Cake

August 2018 - May 2024

My comprehensive role at Design A Cake encompassed the ongoing development of their Magento installation and associated technologies. I migrated and managed their established system comprised of over 10,000 users and 7,000 products.

My duties included management of the server, database, frontend design, backend development, content management, graphic design, social and mail marketing.

I liaised with external IT departments in order to establish our e-commerce dropship model and communicated with customers to evaluate the effectiveness of the system and offer assistance.

I updated the Magento core quarterly with feature and/or security releases which required me to update themes and vendor modules for both Magento and PHP version compatibility.

Other IT skills utilised included designing and printing media and computer management tasks including software and hardware upgrades.

FREELANCE PROJECTS

2012 - Present

I have completed numerous freelance projects for a variety of clients within different sectors, including Veterinary, Hospitality, Real Estate, Education, Business Services & Media.

The aim of the majority of my projects is to establish or modernise a companies online presence. I commonly use Wordpress due to it's scalability and it's accessibility for users. I typically manage all requirements, including domain management, web and email hosting, design, development and any ongoing work. My work is adapt to each clients requirements and my versatile role has been described as "invaluable".

I have additionally fulfilled voluntary roles both online and offline for charitable or altruistic causes.
